# DEMOGRAPHIC SUMMARY CONTENTS

## GUIDE TO CARRIER ROUTES

In this table, identify which streets (or sections of streets) are included in each carrier route.

## DEMOGRAPHIC OVERVIEW

Get a snapshot demographic profile of each carrier route. These are listed in numerical order by zip code and carrier route(s) you want to target. Information for each carrier route includes number of households, number of businesses, median household income, median age, percentage of households with children, median home value, male/female ratio, and ratio of owner versus renter occupied housing.

## ANNUAL HOUSEHOLD INCOME

Organized in descending order by annual household income, this table lets you know which neighborhoods bring in the most income. A full range of income distributions are given, so you can find the neighborhoods with the highest percentage of household in the desired range.

## AGE DISTRIBUTION

Arranged in zip code/carrier route order, these pages show the age distribution of the residents in each neighborhood, from 3 to 5 years of age to 75 and over.

## DISTRIBUTION OF HOME VALUES

Information is organized in descending order by median home value, and shows the percentage of homes in each neighborhood over a particular value.

## HOUSEHOLD & FAMILY STRUCTURE

Arranged in zip code/carrier route order, these pages show the average number of people in each household. Percentages are given for households containing a single resident or married couples, with and without children. You will also be able to identify the percentage of residents in SFDU's (traditional houses) versus MFDU's (apartments, nursing homes, etc.). This and other important family and household information is included in this table.

SFDU = single family dwelling unit  
MFDU = multiple family dwelling unit
